

# Trend Micro™ Client/Server/Messaging Suite for Small and Medium Business

Desktop/Server/Messaging/Anti-spam

## PROBLEM

Security is serious business for small business. Virus attacks have affected businesses of every size and type, causing permanent and unrecoverable damage. Malicious attacks such as these can have a devastating affect on unprotected or under-protected small businesses. And while viruses attack your precious resources, spam-mail exploits them. Spam-mail has become more than just an annoyance, it's a serious resource drain. In addition to wasting valuable time dealing with unwanted email, spam also wastes valuable network bandwidth resources. Point solution products, designed for large companies with extensive IT resources, are unwieldy and expensive. What is needed is a tailored solution that meets the distinct security and spam-fighting needs of growing businesses.

## STRATEGY

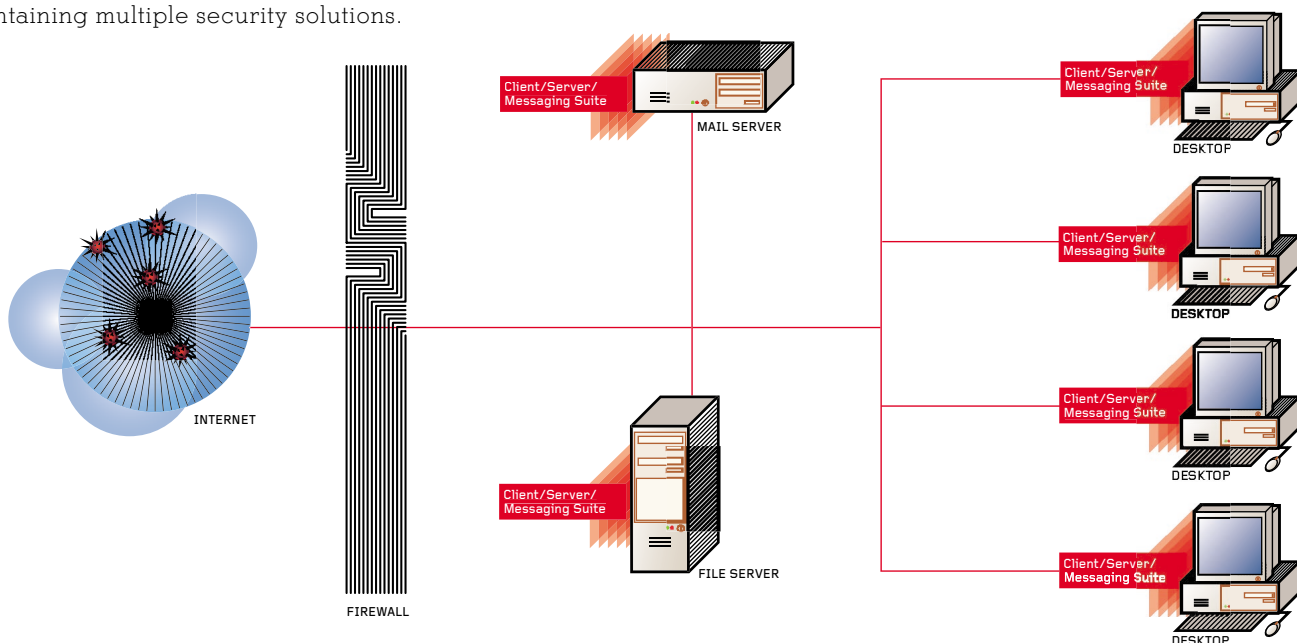

Trend Micro Client/Server/Messaging Suite for Small and Medium Business, an integrated antivirus and anti-spam solution for networked workstations, servers, and Microsoft™ Exchange servers, not only can scan and eliminate viruses within a company's network but is also designed to block spam at the Exchange mail server before it reaches users. What's more, its centralized management capabilities can maximize limited IT resources, delivering enterprise protection in a small business package.

Client/Server/Messaging Suite for Small and Medium Business delivers superior spam detection with low false positive rates by combining advanced heuristic anti-spam engine functionality with signature lookup capabilities, and advanced approved and denied lists.

Client/Server/Messaging Suite for Small and Medium Business also facilitates ease of management with its single Web-based management console, eliminating the complex task of maintaining multiple security solutions.

## KEY BENEFITS

- Designed specifically for growing businesses; combines enterprise-level protection in a small business package.
- Single, comprehensive solution is the perfect solution to antivirus and antispam needs.
- Integrated antivirus and antispam eliminates interoperability issues.
- Lowers the overall costs of virus protection - single product to install, configure, and support.
- Designed to automatically update antivirus and anti-spam protection without user intervention, ensuring that virus pattern files and fixes are current.
- Can automatically remove existing out-dated antivirus from desktops.

*Trend Micro Client/Server/Messaging Suite for Small and Medium Business at Work: Client/Server/Messaging Suite for Small and Medium Business deploys antivirus to PCs, mail servers, and file servers, and keeps them updated by the hour.*
