- Spyware detection and removal
- World-class virus defense
- Round-the-clock monitoring of new threats
- Scheduled and on-demand scanning
- Complete backup and restore for Microsoft SBS Standard and Premium Editions
- Automated transfer of PC DNA from old to new

The IT Challenge for Small Businesses

Today's small businesses face multiple challenges. First, you must adapt quickly to change, respond effectively to customers, increase operating efficiencies and grow your business – all with less time, budget, staff and resources. At the same time, you need to keep your critical Microsoft SBS data as secure as possible, while making it readily available to users who can maximize its value.

In short, you are forced to build flexible yet cost-effective IT systems that are everything to everyone. Until now, you have not had the right tools to manage these challenges, resulting in higher costs, slower response times and an inability to achieve business objectives.

Total Protection for Microsoft SBS Data

CA Business Protection Suites address these challenges head-on with total data protection solutions that are designed right, priced right and sized right for Microsoft SBS users. The suites combine CA's award-winning security, storage and migration technologies, into single, fully integrated solutions that minimize risks, prevent downtime and reduce IT management costs.

Designed to meet the unique needs of small businesses, CA Business Protection Suites support all Microsoft SBS Editions – both Standard and Premium – and protect critical Microsoft application data. With the flexibility and power offered by CA Business Protection Suites, you can protect your IT assets from every day risks and keep your small business running efficiently.

Distinctive Features and Functionalities

- Multi-layered protection.** CA Business Protection Suites deliver multiple layers of protection – security, storage and migration – in single, fully integrated solutions that help ensure your IT assets are secure and available.
- Proactive protection from viruses and spyware.** The suites provide proactive protection against today's most dangerous threats including spyware, viruses, worms and Trojans to secure confidential business information, reduce system downtime and improve PC and system performance. These powerful solutions also help eliminate the time and money spent dealing with virus and spyware outbreaks.
- Round-the-clock monitoring of new threats.** CA Business Protection Suites are backed by the CA Security Advisory Team, a worldwide network of rapid-response centers that are staffed 24x7x365 by a team of expert security researchers and certified support professionals who identify and automatically isolate the latest attacks – no matter where they appear on the network.
- World-class data protection and recovery.** CA Business Protection Suites offer transparent backup and restore protection of Windows-based laptop and desktop computers, enabling you to quickly and easily backup and recover critical information without affecting user productivity and business activity.

Figure 1.

The CA Business Protection Suites provide an easy-to-use desktop-based management console that displays data in an intuitive, dashboard format, providing a complete view of your protection and assets.

- Support for Microsoft Small Business Server Standard and Premium Editions.** CA Business Protection Suites provide the critical backup and restore tools needed to protect a Microsoft Small Business Server environment. The solutions protect confidential application data, including Microsoft Exchange and Microsoft SQL server.
- Efficient desktop migration.** The suites eliminate the need to manually input user settings, preferences and data on replaced and upgraded PCs. By automating this process, you can reduce the total cost of ownership for new PCs, increase technician productivity, decrease end-user downtime, reduce help desk calls and accelerate your return on investment.
- Fully integrated management GUI.** Through a new, fully integrated, Web-based management console, you can manage security, storage and migration for simplified, streamlined administration. The new management console displays data in an intuitive, visual format, providing a complete view of your protection and assets. From this centralized console, you can view and control users, policies, configurations, scans, restores, migrations, updates and logs to quickly respond to new events and effectively manage your protection throughout your organization.

- Simplified management of desktops and servers.** CA Business Protection Suites offer an easy-to-use, web-based management console that delivers a dashboard view of your data protection, enabling you to make informed decisions and isolate problems more quickly. Specifically, the Desktop Control Center combines all client-side activity on one screen for easier administration of your protection technologies. (See Figure 1)

The CA Business Protection Suites also provide a Server Control Center that presents a consolidated status of all protected servers on one screen. (See Figure 2) Powerful, yet flexible, the Server Control Center allows you to generate reports and launch the individual management consoles for your antivirus, anti-spyware, backup and restore protections to help you isolate the root-cause of problems quickly and effectively.

- Simplified installation process.** The security, storage and migration features are fully integrated on both the client and server components, making installation very simple and providing the ultimate out-of-the-box experience. In addition, once the servers are installed, the policies are set and automatically sent to the clients for easier deployment, reduced configuration issues and improved policy compliance.

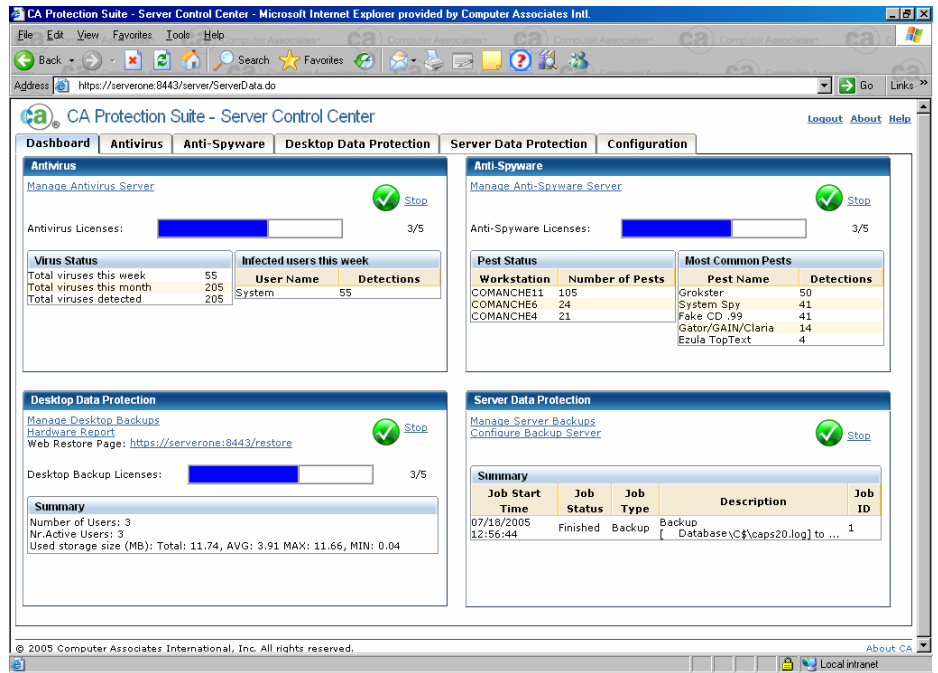

Figure 2.

The Server Control Center is so powerful and flexible that it enables you to generate reports and launch the individual management consoles of all your protection technologies – from one screen.

- Designed and Priced for Microsoft SBS Users.** The suites combine multiple protection technologies into single, fully integrated solutions at a great value that delivers a convenient, simplified buying experience.
- Scalable to support growing business needs.** CA Business Protection Suites make it easy to cost-effectively add-on license capacity in increments of 5, 10 and 20 users.
